

# COMPOSITES INFUSION TRAINING

A HANDS-ON WORKSHOP IN VACUUM INFUSION

Course dates

2014

4-6 February *Register now!"*

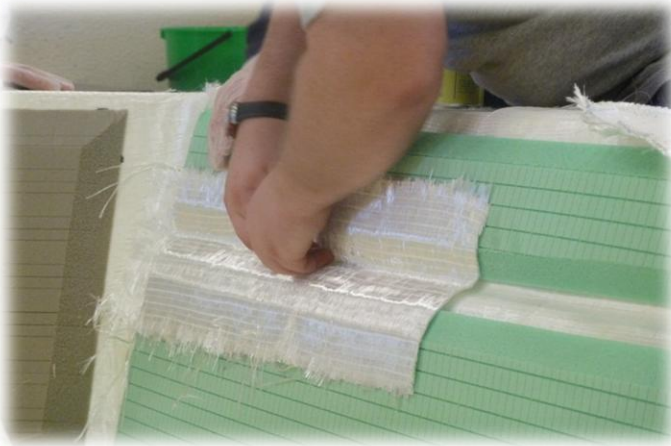

*8-10 April*

*16-18 September*

*25-27 November*

## Composites Consulting Group

CCG is probably the most experienced and successful vacuum infusion consultant on the market today. Since 1999 consultants from CCG has been out in the field leading more than 250 unique larger infusion projects in Europe. The collective experience from all these infusions has for the first time been put into one workshop.

### Composite Infusion Training

CIT combines both theoretical and practical exercises to give all participants a solid foundation in large scale vacuum infusions. What separates CIT from other courses is that we focus on the practical hands-on exercises, During the 3 days of training you will for example infuse a full one shot 3D infusion of a 8 ft. boat hull together with transverse beams.

### Examples of topics covered

- Infusion step by step
- Infusion strategies
- Vacuum integrity
- Planning of large scale infusions
- Introduction to flow modelling
- Fibre lay-up techniques
- Sandwich lay-up techniques
- Infusion materials
- Advanced infusion theory
- Trouble shooting

### Course fee

1400 Euro exl. VAT – The fee includes coffee, lunches and one dinner.

If you register more than one participant from your company the other participant(s) will get 10% discount on the course fee.

### Information and registration

Visit [www.ccg-composites.com](http://www.ccg-composites.com) or contact Mr. Håkan Johansson [hakan.johansson@ccg-composites.com](mailto:hakan.johansson@ccg-composites.com) or +46(0) 430 163 00

Can you handle the pressure?
